

New Low Voltage Switchgear

Bowers Electricals Ltd. supply New Low Voltage Distribution Boards and control panels to suit customers' requirements. We are able to offer short lead times on specialist switchboard requirements using the latest products in our manufacturing process

All our new switchboards use the latest MCCB, ACB and switch fuse units by Merlin Gerin and ABB and are available in various form type specifications suitable for top or bottom cable access and front or rear entry. We are also a recognised panel builder for various manufacturers. Switchboards can be offered to bespoke requirements including required metering, protection generator changeover systems and power factor correction.

In addition to our LV Distribution Switchboards we offer wall mounted distribution boards & LV feeder pillars. Bowers also offer a range of new transformer mounted Feeder Pillars and ACB/MCCB outdoor cabinets, which complement our Transformer Division suitable for direct mounting to outdoor Transformers.
