

Rotating Machines Division

Bowers Electricals Ltd have in stock a large range of both new and used Induction motors and DC machines.

We have for many years been a stockist of Brook Crompton Motors and are an approved Brook Crompton Drives centre generally holding in stock New motors up to 500kW.

Products include:

- New Induction Motors up to 500kW
- Reconditioned Slip Ring and squirrel cage Induction motors up to 5000kW
- Energy efficient motors
- Flameproof motors
- Variable speed drives
- Cooling Fans
- DC Motors
- Thyristor drives & Invertors
- DOL Starters, Star delta starters, Stator Rotor starters.
- Gearboxes

Bowers Electricals is a member of the AEMT (Association of Electrical machinery trades) and our engineers carry out approved training courses through the AEMT and Supplier specific training courses through such suppliers as Brook Crompton.

Generally new motor despatch and assembly is handled by our motor rewind and repair division engineers many of whom are trained in disciplines such as:

- Motor Rewind and repair
- Flameproof motor repair
- Gearbox fitting and assembly

We are also able to supply also many larger sizes of machines through association with other overseas partners which enables us to offer a substantially broader range of machines.
