

## New High Voltage Switchgear

**Bowers Electricals Ltd** supply New High Voltage & Medium Voltage Switchgear to suit customers' requirements. This is achieved through holding of large quantities of HV Stock to improve lead time performance and also through project management and liaison with several leading HV switchgear manufacturing companies.

A full range of 11000v new switchgear is available and we are able to offer various makes and types in most insulating mediums including Vacuum & SF6 isolators, Circuit breaker feeders, Bus section switches and Ring main units. We can also offer 11kV metering units and associated metering equipment.

Bowers Electricals Ltd is a Stockist of New Schneider Ringmaster SF6 extensible switchgear and Ring Main Units which are held on stock to achieve short delivery periods often being despatched on urgent requirements.

Schneider transformer mountable switchgear can also be fitted to our range of new and refurbished Distribution Transformers providing TLF or self powered VIP 300 relay protection.

We are also able to supply GE Secovac, Schneider Genie and Hawker Siddeley Eclipse and various other makes and types of HV switchgear. Our sales team can assist you with Network design, and protection

requirements ranging from typical Transformer feeders & incomers to generator and utility system protection.

We also hold a large stock inventory of associated products including necessary cable boxes and interconnecting busbars to allow packages to be arranged on a short lead time basis.

Our stocks of new and refurbished Transformers, HV and LV switchgear together with our site installation services, enable us to provide a fast and responsive service to our customers.

We offer an extensive range of new battery tripping units for use with new switchgear products.
